

Paras Foam Industries

Khasra No. 17-18, Behind Parle G Biscuit Factory, Surya Nagar, Bahadurgarh -124507, Haryana.

Company's Introduction

Paras Foam stands as a premier manufacturer specializing in top-quality Oil and Gas Pipeline Cleaning Products. Recognized for our unwavering commitment to excellence, we offer products of unparalleled quality at competitive prices. With a steadfast dedication to timely delivery, we have earned the trust and loyalty of a vast clientele, solidifying our position as a leader in the industry.

Our Esteemed Clientele

Our Product Catalog

Uni-Directional Pigs

The design philosophy of pipeline cleaning using cup pigs lies behind the need to pig in a single direction.

Coated Pigs

We make pigs to handle highly corrosive chemicals and used for regular wiping and general pipeline cleaning. Models are available in light, medium, and heavy density foam.

Floating Buoys

Employed as an aid to mariners to mark the navigable limits of channels, their fairways, sunken dangers, isolated rocks, telegraph cables, and the like

Scraper Pigs

Steel bodied pipeline pigs that can be used to batch dissimilar fluids and to perform long distance cleaning.

Foam Pigs

Foam pigs are a versatile type of pipeline cleaning device. They are used for drying, cleaning, batching, and product removal operations.

Bi-Directional Pigs

Bi-Directional Pigs are designed travel in either direction in a pipeline and to be used for hydrostatic testing, displacement of water or air, removal of debris, liquid evacuation and/or product separation.

Spares

PU Cups , Sealing Disks, Guide Disks,
Gauge Plate, Brushes and Magnets etc.

Pig Launchers and Receivers

A pig launcher is a system used to send a PIG through a pipeline. It uses pressure to propel the PIG out of the launcher barrel and sends it through the pipeline system.

Our Services

Liquid Cargo Management Consultancy Services

Our international shipping consulting team helps shipping lines and port operators take on new and longtime challenges to emerge leaner, cleaner, and more profitable.

Pipeline Pigging Solutions

We provide Pigging solutions that helps to recover lost product, eliminate flush waste, minimize the cost of using dedicated piping, and result in consistently higher product quality. Helping companies be more competitive, reach continuous improvement goals, and be better stewards of the environment
